

Project idea

⇒ Exam recognⁿ using hand recognⁿ

⇒ how take 2 inputs?

① → Student hand written answers in bluebook, gotta read it in pdf or other pictures taking Software...

② → Answer Schema given by Admin / teacher that is either in text or hand written,

⇒ so, it has to take both inputs read them, search, compare key words
blwn 2 inputs...

⇒ challenges how to implement
→ hand recognition code
→ interface?

→ hand recognition datasets?

→ original our answer paper & schema from previous semesters.
